

How to make a Template for Briz Bumpers

Making a template is very simple and can be accomplished in several ways. If your car has a splash pan or gravel shield, the best method is to send us a tracing of the pans, indicate the path of the bumpers when they extend past the pans. If you don't have gravel guards but have the original bumpers and want the new bumpers to be made the same length and shape you can simply lay them on a piece of butcher or masking paper and trace the front or rear face (whichever most closely follows the contour of the car) with a felt type marking pen. If you do not have an original bumper or splash pan or you want something other than stock shape you can make us a template from scratch. The best method to accomplish this is to trim a large piece of sturdy cardboard to the desired shape place it on the vehicle to make sure you are happy with it, then trace this shape to a sheet of paper and send it to us. If you are making a template for "split" bumpers please indicate which side of the line has the ribs on them. Please include year and make of the vehicle, if you are wanting our 3 or 5 rib bumpers and a way to contact you.

You can send the template to us at:

**Briz Bumpers
PMB 260
8002 NE Hwy 99 #B
Vancouver, WA 98665**

If you have any questions you can call us at 360.573.8628 or email us at brizbumpers@comcast.net or brizbumpers@gmail.com and we will be happy to help you.
